DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 02/23/2009 has been entered.

Applicants' arguments, filed 02/23/2009 and 05/04/2009, have been fully considered. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Election/Restrictions

Because Applicant amended around the prior species, the following species is now examined:

which reads on the instant claims where instant $R_1=H$, $R_2=H$, $R_3=H$, $Q=Cry$ and R_y is H , X is CHR_7 and R_7 is H but the group is not present when $p=0$, $Y=C(O)(CH_2)_n$ where $n=0$, $R_6=C_6$ aryl optionally substituted with C_1 alkoxy, $R_4=H$, and $R_5=H$.

Claim Objections

Claims 1-3 and 6-8 are objected to because of the following informalities:

Examiner notes multiple uses of the letter "n" to define the number of CH_2 groups in various R groupings (such as R_2 , R_3 , R_4 ,...). It is unclear if "n" is independently selected for each group or if "n" is constant for all. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Ienega et al (US 4,708,961).

Ienega et al teaches the compound 3-(p-methoxybenzoyl)-N-acetylindole (col 2 line 3).

Allowable Subject Matter

Claim 11 is allowed. The closest prior art appears to be Ienega et al (US 4,708,961), discussed above, and Giudicelli (FR 74 26208 A1), discussed in the Final Office Action dated 02/03/09. Neither of these references teaches the R groups of instant claim 11, where the instant R groups include such groups as heteroaryl rings, substituted amines, and alkyl esters. The prior art does not provide motivation for one of ordinary skill to substitute the methyl and hydrogen group in the prior art compounds for the instantly claimed R groups.
